

# GONZALO SALVADOR CORVALAN

## FULLSTACK DEVELOPER

gonzalosalvadorcorvalan@gmail.com | www.corvalangonzalo.com | github.com/TheMrCorvy

### BACKGROUND

With a strong background in web development gained through years of Fullstack work.

Skilled in Frontend and Backend web technologies such as HTML, CSS, JavaScript, Next JS, TypeScript, and Node.JS.

Proven ability to work independently and meet tight deadlines while ensuring high-quality code.

### EDUCATION

**SYSTEMS ANALYST, BACHELOR OF INFORMATICS**  
Interamerican Open University. Buenos Aires, Argentina.  
2023 – 2025

**JAPANESE LANGUAGE**  
ISI Language School. Kyoto, Japan.  
2022 – 2023 | **JLPT N3** - **73/100** (December 2022)

**ENGLISH LANGUAGE**  
CUI (University Language Center). Buenos Aires, Argentina.  
2018 – 2022 | **TOEFL IBT** - **95/120** (August 2020)

### EXPERIENCE

**FULLSTACK TS DEVELOPER | GLOBALLOGIC**  
United States, remotely. October 2023 – Present.

Currently engaged as a **Fullstack Node.JS** with **TypeScript** developer, leveraging expertise in React.JS' framework, Next JS.

- Developing together with the Backend team a new flow to handle users' identification, and implementing the system across multiple API consumer apps.
- Coordinating tasks with multiple team members from different sectors such as design, UX/UI, Backend, and DevOps.
- Development focused on customer satisfaction and computer security.

**FRONTEND REACT DEVELOPER | FINALIS**  
United States, remotely. December 2023 – April 2024

Short-term side-job where I performed as a Frontend developer for a fintech located in the US, helping on the migration from a **GraphQL** integration to a **REST API** approach, while following the **SOLID** principles and making use of tools such as ES Lint and Prettier to ensure good code quality.

**FULLSTACK PHP DEVELOPER | BIWINI**  
Buenos Aires, Argentina. April 2023 – October 2023

Engaged as a **Fullstack PHP developer**, applying my knowledge in Laravel framework to digitalize legal processes and procedures for state entities, prioritizing efficiency regarding backend responses and securing communications between Frontend and Backend via **Laravel's** built in REST API methods.

**FRONTEND DEVELOPER | TSUMUGI HOTEL**  
Kyoto, Japan. April 2022 – March 2023

Contributed to the web development team for a prestigious hotel in Kyoto. Among other things, my tasks included translating documentation from Japanese to English, updating old Class-based components to hooks and server-side rendering with Next JS and TypeScript, and helping in the process of restructuring the project's internal architecture to follow the principles of **Clean Architecture**.
